Mobile: +91 9369344917

Skills

Languages: Python, TypeScript, JavaScript, SQL
Backend: Node.js, Fastify, REST APIs, PostgreSQL, Prisma, Inngest, MCP
Frontend: React, Next.js, Tailwind CSS, TanStack Query, TanStack Table, Vite
Tools: Docker, nginx, GitHub Actions, Linux, Bun, Playwright, Google Cloud Run

Experience

Codeflix Labs — Remote
Full Stack Developer Intern – Repomind — Mar' 26 – Aug' 26

- Built and deployed Repomind, a Next.js and PostgreSQL coursework platform with student, faculty and admin workflows, where faculty approve AI-suggested marks on GitHub projects.
- Prevented topic overbooking with PostgreSQL Serializable transactions, handling competing assignments to the same remaining seat without allowing both to commit.
- Moved AI grading and repository synchronization into Inngest background jobs with concurrency and rate controls, keeping long-running work off the request path.
- Worked on automated tests, GitHub Actions and Docker deployment checks, database backups before migrations, and rollback handling for failed releases.

Projects

Levelhead | TypeScript, Fastify, PostgreSQL, React | GitHub — Jun' 26 – Present

- Built a technical-interview mentor connecting practice to candidate answers and project code; separated the generative interview conductor from the evaluator.
- Implemented code-controlled question selection and append-only session events, so plans, questions, answers and findings can be inspected and replayed.
- Required findings to cite quoted answer spans and allowed abstention when evidence is insufficient. Evaluator accuracy has not been benchmarked.

Ground Truth | TypeScript, Next.js, Cloud Run | GitHub | Live — Sep' 26

- Built an environmental public-record report for a US address, drawing on six sources for air quality, flooding, contaminated land and nearby industry.
- Loaded independent sources in parallel and streamed report sections as they arrived; displayed source failures without blocking the rest of the report.
- Connected report values to agency records, raw fields, fetched URLs and response hashes using typed provenance. Used source-backed templates rather than a combined safety score.

Agent Visa | Python, MCP, SQLite | GitHub — Aug' 26

- Built scoped, time-limited agent permissions with human approval, access receipts and cascading revocation. Delegated visas cannot exceed their parent's scope or lifetime.
- Separated authorization policy from storage and transport. Used SQLite as a stand-in for a gated external memory API; full external integration is not claimed.

Certifications & Achievements

Cloud Computing | NPTEL — Aug' 25
Top 10 of 150+ teams, ByteBash Hackathon at LPU — Oct' 23

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology – Computer Science and Engineering; **CGPA: 7.35** — Aug' 23 – Jul' 27

Oxford Model Senior Secondary School — Kanpur, Uttar Pradesh
Intermediate; **Percentage: 77%** — Mar' 20 – May' 21

Oxford Model Senior Secondary School — Kanpur, Uttar Pradesh
Matriculation; **Percentage: 88%** — Mar' 18 – May' 19
